Inclusive security risk management

An individual's personal security is impacted by the interplay between where they are, who they are, and their role and organisation. As employers, broadcasters and production companies have a duty of care to take all reasonable measures to protect their staff from foreseeable risks, including those that emerge due to an individual's personal characteristics – for example, biological sex, gender, ethnicity, cognitive and physical abilities, and sexual

orientation. Individual, organisational and context-related vulnerabilities interact with internal threats from within the organisation and external threats from the Employer's Role and context. These interactions duty of care organisation affect the risks faced by the towards all individual and the staff organisation Individual (intersectional Context identity) Employer's duty

All those working in TV have a diverse profile brought about by the intersectionality between the different aspects of their personal identities. This intersectional personal identity interplays with an individual's organisational role and their relationship to their operational context.

Individual	Organisation	Operational context
Intersectional identity		
Age	Seniority	Legal (national laws and
Race/Ethniciy	Contract type (e.g.	their enforcement,
Nationality	employee/freelancer/	including lack of
Religion	employed via third party;	protections)
Gender/Sex	local/international)	Cultural attitudes
Sexuality	Contract duration	Rural/Urban/Regional
Physical/Mental health	Job title	differences
and ability	Travel obligations	Sensitivities related to
Marital/Partnership status	Accommodation	production content
Physical appearance	Partner organisations	Bilateral agreements
Previous professional	Relationship with external	with crew members'
experience	actors (e.g. government,	country of citizenship
	sporting federations)	
	Organisational culture	
	Production genre	

A better understanding of the interplay between the different facets of an individual's identity can help production understand the security risks faced by its crew and ancillary workers. The strength of adopting this holistic approach to identity is that it shows how different strands of power, identity, ability and choice intersect to influence the conditions in which those in the TV industry live and work.

of care towards international and relocated national staff

The failure to understand how personal profile characteristics impact personal security can have implications for the security of both the team as a whole and for the individual crew member working on a production, as well as causing serious security, legal and reputational issues for broadcasters and production companies.

Click on each box for a list of key recommendations or see pages 3-7 for the full list.

Policy

The security policy references diversity in risk and reinforces the equality, diversity and inclusion policy.

Roles and responsibilities

Roles and responsibilities in relation to security and diversity are clear.

Risk assessments

Risk assessments consider diversity in risk profiles, include both external and internal threats, inform security plans, and support informed consent during recruitment, travel and deployment.

Security plans

Security plans are adapted to meet the security needs of a diverse range of personal profiles.

Data and information sharing

Data on different staff profiles is collected appropriately and confidentially and used to inform security risk management decisions in line with security and equality, diversity and inclusion policies.

Inclusive Security Risk Management

Induction, pre-departure and training

Induction, pre-departure briefings and training consider diversity in personal profiles, and support staff informed consent, security-related decision-making, and other security risk management processes.

Crisis management

Crisis management plans consider the diversity of staff and address differing needs.

Incident management

Staff have multiple confidential ways to report incidents that are motivated by their personal profile. Incidents related to personal profiles are confidentially recorded and used to inform inclusive security risk management

Travel

The differing security needs of travellers are considered and addressed.

Deployment

Deployments are informed by personal risk profiles, where appropriate, and all deployment decisions are made transparently and consultatively in line with security risk management and human resource policies and procedures.

Policy

- Make reference to production crew diversity and the impact personal profiles can have on security in the organisation's security policy. Establish guiding principles on what this means for the organisation in practice.
- Keep the security policy up to date and reflect learnings from production crew and incidents, as well as changes in legislation.
- Make clear links between the security policy and the equality, diversity and inclusion policy.
- Consult minority profiles in the development of policies, as this is an
 effective way to better ensure these policies will be inclusive.
- Complement policies with training for production crew and monitor implementation.

KEY RECOMMENDATIONS

Roles and responsibilities

- Clarify roles and responsibilities in relation to security and diversity as part of the organisation's security risk management framework.
- Consider providing specific training to security staff on duty of care and anti-discrimination obligations.
- Encourage security focal points to draw on external expertise where necessary to make appropriate security decisions that relate to personal risk profiles.
- Include HR teams in the security risk management planning process to offer legal guidance on anti-discrimination and reasonable adjustments, as well as to ensure staff wellbeing and duty of care are considered.
- Ensure that security and HR departments work closely together on security and diversity issues.
- Consider how to diversify representation in senior leadership on productions and in security-specific roles.
- Ask senior leaders to act as role models to change organisational culture in relation to minority profiles, and to successfully lobby for change in attitudes towards diversity within the sector more broadly.
- Provide equality and diversity training for existing senior leadership.
- Consider creating an equality, diversity and inclusion focal point to provide production crew and ancillary workers with a number of paths to raise concerns.
- Ensure that a diverse range of crew member personal profiles are involved in security risk management processes and systems.

Risk assessments

- Include a variety of specific profiles in the risk assessment to provide sufficient information for informed consent during recruitment and deployment.
- Collect information on production crew profiles at recruitment stage in a systematic way that ensures data protection.
- Use this information to carry out inclusive risk assessments, which should include both internal and external threats to production crew.
- Involve staff with a diverse range of personal profiles to develop risk assessments.
- Use these inclusive risk assessments to inform:
 - Job descriptions and recruitment packages
 - Briefings that aim to ensure informed consent of production crew
 - Trainings
 - Other security risk management measures, e.g. mitigation activities and contingency plans
- Ensure inclusive incident reporting feeds into risk assessments.
- Respond to issues of crew mistrust in confidentiality and data protection – especially around dealing with internal threats.

KEY RECOMMENDATIONS

Security plans

- Consider internal as well as external threats in security plans.
- Include a broad cross-section of insights, national and international, in the security planning process, to understand the range of risks and the interplay between different facets of identity within the context.
- Ensure that while mitigation measures consider crew diversity, they remain similar for all production crew whenever possible.
- Check that if differentiated measures are necessary for particular profiles, they are also proportionate to the specific risk.
- Involve affected crew members in discussions around the specific mitigation measures to ensure their appropriateness and compliance.
- Provide training and support to empower security focal points and other decision-makers in managing internal threats to staff in collaboration with HR.
- Share security plans with production crew at pre-departure stage, to allow them to raise concerns about particular risks, and provide more time to put in place proactive measures to address risks for staff with particular vulnerabilities.
- Consider the impact of digital security risks on production crew as part of the organisation's security plan.

Induction, pre-departure briefings and training

- Include components around diversity and inclusion, especially as part of codes of conduct, in the induction process, and explore how these link with personal responsibilities for security and organisational duty of care.
- Consider the degree to which pre-departure training and briefings address diverse profiles.
- Do not 'target' individual people in inductions and pre-departure briefings; instead, keep these generic, to be received by all production crew, and provide specific guidance and signposting that address diverse personal profiles.
- Include examples in the security training from practice that relate to different ethnicities, people with disabilities and different genders/ sexualities, as well as issues related to intersectionality.
- Ensure that trainers have the necessary skills, information and training to deliver sessions that are suitable for staff with a diversity of profiles.
- Formally train security focal points on diversity, equality, inclusion, antidiscrimination and how these interact with duty of care obligations.
- Clarify during security-related training that all individuals, no matter what their personal profile is, will be vulnerable to threats in given circumstances. It is important to not fall into the trap of assigning vulnerability to specific groups, e.g. women, LGBTQI staff, etc.

KEY RECOMMENDATIONS

Deployment

- Take all reasonable steps to keep staff safe and secure.
- Keep deployment decisions transparent and in line with security risk management and human resource policies and procedures. Involve dialogue and discussion with the crew member(s) concerned where appropriate.
- Ensure that crew members with minority profiles have the confidence to work with security focal points to ensure deployment security measures reflect the concerns of particular profiles.
- Consider asking detailed questions to ensure the suitability of accommodation, particularly for crew with minority profiles.
 Some examples would be:
 - Is it accessible to people with disabilities?
 - How could it be made accessible to people with disabilities?
 - How accessible is it for crew to get to and from key locations (e.g. the office and amenities)?
 - Are there spaces where crew can hold private conversations/ phone calls?
 - Can bedrooms and wash facilities be securely locked?
- Ask about the potential for reasonable changes to be made to deployment plans or whether alternative options can be found before deciding that the posting is not appropriate for a particular profile.
- Ensure that crew members' experiences post-deployment inform pre-deployment trainings and briefings.

Travel

- Consider the differing security risks faced by travellers on short visits in comparison with those on longer-term deployments when looking at mitigating measures.
- Encourage an open culture within senior management and security focal points, to give production crew with minority profiles the confidence to come forward and help ensure travel management decisions reflect the concerns of particular profiles.
- Ensure in-country travel checklists include questions about how different profiles will be kept safe from both internal and external threats.
- Remind all travellers of the incident reporting mechanisms available to them, as well as the consequences of harassment.

KEY RECOMMENDATIONS

Incident management

- Induct all on the use of incident reporting procedures, including what happens after an incident gets reported and how confidentiality is maintained.
- Raise awareness of when an incident may be related to the crew member's personal profile.
- Train several members of staff or production crew to receive incident reports.
- Put in place a comprehensive data protection policy which is shared with all production crew.
- Establish clear disciplinary procedures for production crew who
 engage in hostile behaviour towards colleagues due to their personal
 profiles, raise awareness among crew of the consequences of such
 behaviour, and ensure disciplinary measures are implemented
 consistently.
- Develop an incident response checklist that considers diversity and incidents affecting production crew with minority profiles.
- Develop an anonymous equality and diversity monitoring form that accompanies an incident report template and develop a process on how to make use of this information in a confidential manner.
- Ensure clarity between security focal points and HR staff on the responsibility of monitoring incidents between crew that may be motivated by personal profiles.
- Carry out a regular anonymous survey of production crew to understand the scale and nature of security incidents, including harassment that has not previously been reported, and to identify underlying attitudes.

Crisis management

- Crisis management teams should consider these key questions when planning for different individual profiles in a crisis:
 - Are any additional evacuation or relocation measures necessary for crew members with disabilities (natural hazard/conflictdriven/medical)?
 - Are different crisis management approaches necessary when dealing with the abduction of a local crew member versus an international crew member? What about the additional risks associated with a particular profile?
 - What steps should be taken if a production worker is arrested on suspicion of same-sex activity in a context where this is illegal?
- Think carefully about the diversity of staff available to conduct a
 post-crisis debriefing, and ensure these individuals are aware of
 the assumptions they may make about the profile of the person
 they are debriefing.
- Provide a list of recommended post-crisis support, e.g. psychosocial care, with a short description of particular providers' areas of expertise.
- Ensure that insurance policies consider the diverse needs of production crew based on their personal profiles.
- Include information on insurance cover within induction programmes, so that if there are exclusions then production crew are aware that they might need to have their own insurance policies in place.

KEY RECOMMENDATIONS

Data and information sharing

- Identify what data is already collected on different profiles in recruitment, deployment and operations, as well as incidents and crisis management.
- Identify the gaps in data being collected, and decide what is reasonable to collect at each stage to ensure the safety and security of production crew and ancillary workers.
- Review methods of data collection, including equality and diversity monitoring and incident reporting for a diverse range of individual profiles.
- Identify the staff best placed to collect data in recruitment, deployment and operations, as well as incidents and crisis management.
- Train staff in data collection, data protection and how to turn the data into useful information that will support security risk management processes.
- Communicate data protection policies to all production crew and strictly abide by these guidelines.
- Pilot data collection methods and seek feedback from production crew with minority profiles.
